

Dear Parent or Guardian,

The Virginia State Board of Education requires that parents be notified in advance of any units that will be taught in **Family Life Education**.

Most units in the **7th grade** curriculum are taught as part of the general health program and focus on developing personal characteristics that contribute to the happiness and general well being of self and others. However, one unit, taught separately to boys and girls, deals with the physical, social, emotional, and physiological changes that occur at the time of puberty. Information on consequences of premarital sexual activity, sexually transmitted diseases (including AIDS), and pregnancy is also a part of this unit.

You are encouraged to visit the school media center to review the Family Life Education program summary, the curriculum, and instructional materials available for use in the program.

All videos used in the program are housed in the office for curriculum and instruction located on the second floor of the School Administration Building, 915 Court Street. Videos may be viewed at this location or at the school media center. To view videos at the School Administration Building, call 515-5022, to make arrangements. To view videos at the school, contact the school librarian. Because videos may be in use at other schools at the time of your request, they may not be available immediately for preview. Upon request, your child's family life teacher can give you the titles of any videos that will be used in class.

You may exercise your "opt-out" right if you believe any part of the Family Life curriculum is not appropriate for your son or daughter. Alternate assignments related to health will be provided for students whose parents elect to "opt-out." **Please complete and return the attached option statement to your child's Physical Education teacher to indicate your preference for participation.**

Sincerely,

Al Coleman
